NIDHI SHARMA

AI Engineer | Agentic AI Engineer | Full Stack AI Engineer

nidhisharma1133@gmail.com | 7042918917 | Delhi, India
linkedin.com/in/nidhisharma11 | github.com/Nidhi-Sharma-1612

PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience building and shipping production web applications (Next.js, TypeScript, Node.js, PostgreSQL), transitioning into AI Engineering. Certified Agentic AI Engineer (Edureka, 2026) with hands-on experience building autonomous AI agents using LangChain, LangGraph, CrewAI, and LlamaIndex, including Agentic RAG (ReAct framework), multi-agent orchestration, and vector search. Have shipped AI-powered products in production, including an AI legal-document platform and an AI website generator. Looking to apply full-stack engineering strength and applied AI/LLM skills to an AI Engineer / Full Stack AI Engineer role.

TECHNICAL SKILLS

Agentic AI & LLM: LangChain, LangGraph, CrewAI, AutoGen, LlamaIndex, Agentic RAG, ReAct Framework, Multi-Agent Systems, Prompt Engineering, Agent Memory

Generative AI / LLMs: OpenAI GPT-4o, Google Gemini, Cohere, RAG, Embeddings, Semantic Search

Vector Databases: Pinecone, Hybrid Search

Full Stack Development: Next.js, React.js, TypeScript, JavaScript, Python, Node.js, Express.js, REST APIs, GraphQL, Tailwind CSS

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Claude Code, Figma, Jira

PROFESSIONAL EXPERIENCE

Full Stack Developer | **DesignByDial** | **Remote** | **June 2026 - Present**

- **Own end-to-end delivery of** 10+ production vacation-rental websites and web apps (Next.js, TypeScript, PostgreSQL), including designbydial.com and staywithrentico.com.
- **Built a multi-tenant admin/CMS panel** used to manage content and leads across 10+ client frontends from a single dashboard.
- **Integrated third-party PMS and payment APIs** (Hostaway, Guesty, Lodgify, Stripe) and manage deployment on Hostinger VPS with Coolify.

Frontend Developer | **Flowlaunch** | **Remote** | **June 2024 - October 2024**

- **Built Docuswift, an AI-powered legal-document platform** - implemented AI case-chat features (regenerate response, dislike feedback, persistent chat history) and integrated multiple APIs to surface AI-generated case insights.
- **Built Sites60, an AI website generator** that creates fully customizable sites in 60 seconds - developed responsive templates and AI content edit/regenerate/delete workflows via REST APIs.
- **Built the Docuswift and Flowlaunch marketing websites** (Next.js, Tailwind CSS) end-to-end from Figma design to production.

Associate Software Developer | **Rapid Innovation** | **Remote** | **August 2021 - December 2022**

- **Built and maintained React and Next.js applications** for blockchain-based DeFi and online gaming platforms (Exo DeFi Marketplace, Pulse Crash betting game), integrating blockchain APIs using Web3.js.
- **Developed reusable, dynamic UI components** using Styled-Components, following Figma designs and design system guidelines.
- **Integrated GraphQL APIs and subscriptions** for real-time data updates, including live crash-point updates for an online betting game.
- **Implemented interactive charts and animations** using ApexCharts and Canvas to visualize market data and real-time game/asset events.
- **Collaborated cross-functionally** with backend, design, and blockchain teams to deliver features end-to-end.

AGENTIC AI PROJECTS

AI-Powered Competitive Analysis Agent - Agentic RAG (ReAct)

Tech Stack: Python, LlamaIndex, Cohere, ReAct, Streamlit

- Built an agentic RAG system using the ReAct (Reason + Act) framework to decompose queries into sub-goals, retrieve from a LlamaIndex vector index, and generate structured competitive insights.
- Used Cohere for embeddings and generation, with adaptive retrieval logic and full reasoning-step transparency in a live Streamlit app.

YNC Customer Support Triage Agent

Tech Stack: Agno, OpenAI GPT-4o-mini, Pinecone, Streamlit

- Built an e-commerce support-triage agent that classifies tickets by sentiment/urgency/intent, drafts policy-compliant replies with GPT-4o-mini, and retrieves similar tickets/policies via hybrid search over Pinecone; includes a supervisor dashboard with KPI metrics and AI-generated summaries.

Rayeva AI - AI-Powered Sustainable Procurement Platform

Tech Stack: React, Node.js, Express.js, MongoDB, OpenAI GPT-4o

- Built a full-stack B2B platform with an AI Product Categorizer (GPT-4o) and an AI Proposal Generator that auto-creates procurement proposals with budget breakdowns and ESG/carbon-impact summaries, with clean separation between AI/prompt logic and business logic.

FeedWise Agent - Multi-Agent Feedback Triage System

Tech Stack: CrewAI, Python

- Built a 6-agent CrewAI pipeline that automates triaging of app-store reviews and support emails - classifying feedback, extracting bug/feature details, generating structured tickets, and scoring ticket quality end-to-end.

Additional agentic-AI projects (GitHub: github.com/Nidhi-Sharma-1612): a LangGraph healthcare research assistant with human-in-the-loop approval, a LangChain code-review agent, and a Langflow-based bookstore assistant.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering
Krishna Engineering College, Ghaziabad | 2017 - 2021 | 89.76%

Senior Secondary (Class XII), PCM with Computer Science
Greenway Modern School, Dilshad Garden | 2016 - 2017 | 71.80%

Secondary (Class X)
D.A.V. Public School, East of Loni Road | 2014 - 2015 | CGPA 9.2

CERTIFICATIONS & ACHIEVEMENTS

- **Agentic AI Engineer Certification** - Edureka, May 2026
- Node.js, Express, MongoDB and More: The Complete Bootcamp (2024)
- The Complete Web Development Bootcamp (2021) - Udemy
- Programming for Everybody: Getting Started with Python - University of Michigan (Coursera)
- Certificate of Merit - Awarded for academic excellence in First, Second, Third, and Fourth Year of B.Tech
